

linear predictor

A 3D surface plot within a wireframe box. The vertical axis is labeled 'linear predictor' with an upward arrow. The horizontal axis on the left is labeled 'curb.weight' with a downward arrow. The horizontal axis on the right is labeled 'engine.size' with a downward arrow. The surface is a grid of colored rectangles, transitioning from green at the bottom to yellow and then orange at the top. The surface slopes upwards from the bottom-right towards the top-left, with a slight ridge or change in slope along the 'engine.size' axis.

curb.weight

engine.size
